## Festival and Vending Overview

Thank you for your interest in food vending at Governors Days! The three-day festival attracts thousands of attendees from Grimes and surrounding communities. The event continues to grow and recently moved locations to accommodate the increasing number of attendees.

Due to the popularity of the festival, there are a limited number of food vending opportunities available each year. Priority is generally given to food vendors who have successfully participated in prior years. Festival coordinators make every attempt to not saturate the event with an excessive number of food vendors while also balancing the needs of the festival by offering a variety of different cuisines to attendees.

This informational packet has been carefully assembled to ensure the smoothest experience possible for both food vendors and festival event coordinators. The Grimes Chamber takes pride in building longstanding relationships with all vendors, many of which, return year after year. Please review this material very carefully. If you have questions, please contact Ben Schoning with Grimes Parks & Recreation at [bschoning@grimesiowa.gov](mailto:bschoning@grimesiowa.gov)

## Electricity Information

To eliminate generator noise and air pollution during the event, all Governors Days food vendors are required to use electricity provided by the festival. Generator usage of any kind is not permitted.

The purpose of this form is to gather food vendor electrical requirements in advance to avoid any electrical changes or delays during the event. It is extremely important that the information provided below be 100% accurate as any changes (total amp draw, plug or receptacle style, number of outlets needed, etc.) will be subject to additional fees. It is the responsibility of each food vendor to know the total amp draw required to power all equipment intended for use during the festival.

Governors Days has contracted with an electrician to provide electrical sub panels with continuous 24x7 power throughout the duration of the event. It is the responsibility of each food vendor to provide all necessary electrical cords with the appropriate length, plug style and rating to utilize the provided sub panel receptacles. Electrical cords must be a minimum of 25 feet in length and are not permitted to be suspended in the air, run through another vendor's space or be placed in a walkway.

Each food vendor will have a designated electrical receptacle for use throughout the event. Food vendors are not permitted to move or make changes to the electrical sub panels or receptacles in any manner including adding additional electrical load other than what was originally requested on this form. Any food vendor found to be utilizing more power than what was originally contracted will be subject to additional fees. Refunds will not be given for unused power or receptables.

Governors Days assumes no responsibility for unplanned power outages, power surges or power sags. It is the responsibility of each food vendor to monitor and ensure appropriate equipment function throughout the event. If a planned power outage should become necessary during the festival, Governors Days staff will make every effort to notify all those listed as primary and backup contacts on the Business Information Form of the Food Vendor Registration Packet.
